PROFESSIONAL SUMMARY

Data and AI professional with 2 years of relevant experience at a Canadian telecom retailer, spanning data analysis, QA testing, IT operations, and stakeholder management. Dual Postgraduate credentials in Big Data Analytics and Artificial Intelligence (Georgian College, Canada) with AWS and Power BI certifications. Skilled in Python, SQL, LangChain, RAG pipelines, and Power BI. Proven ability to build production-ready AI applications and turn raw business data into actionable insights that drive revenue growth and operational efficiency.

TECHNICAL SKILLS

- Languages & Tools: Python (Pandas, NumPy, Scikit-learn), SQL, Advanced Excel (Pivot Tables, VLOOKUP, INDEX-MATCH, Macros)
- AI / LLM Stack: LangChain, LangGraph, RAG Pipelines, LLM APIs (Anthropic, Groq), Vector Databases (FAISS, ChromaDB), HuggingFace, Prompt Engineering
- AI / ML: Supervised & Unsupervised Learning, Deep Learning (CNN, RNN), NLP, Feature Engineering, Model Evaluation
- Visualization & BI: Power BI (DAX, Data Modeling), Tableau, Matplotlib, Seaborn, Streamlit
- Cloud & Deployment: AWS Cloud Foundations, ML on AWS, Streamlit Cloud, Git & GitHub
- QA & Testing: Functional & Regression Testing, Bug Documentation, Data Validation
- Business: Vendor Coordination, Inventory Analytics, CRM, Sales Reporting, Cross-functional Communication

WORK EXPERIENCE

Data & IT Operations Analyst | Raza.com (Telecom Retail), Mississauga, Canada | Jul 2024 – May 2026
Promoted from Retail Sales Supervisor based on demonstrated analytical capabilities.

- Analyzed sales, inventory, and telecom plan metrics across multiple locations using Python and Excel; helped reduce slow-moving inventory by ~15% through data-backed stocking recommendations.
- Built and maintained Power BI dashboards for management reporting (revenue trends, plan activations, retailer performance), replacing manual Excel reports and cutting report prep time by ~40%.
- Conducted functional and regression QA testing for internal mobile apps; caught 20+ bugs across 3 release cycles, reducing post-deployment issues.
- Integrated AI tools (ChatGPT, Claude) into daily workflows for data cleaning, reporting, and automation — reducing routine task time by ~30%.
- Managed IT operations (POS setup, troubleshooting, hardware config) across store locations, maintaining 99%+ system uptime.
- Primary contact for retailer and vendor communications; streamlined coordination workflows, reducing query response time by ~25%.

Retail Sales Supervisor | Raza.com (Telecom Retail), Mississauga, Canada | Oct 2022 – Jun 2024

- Built the store's first Excel-based operational trackers for inventory, sales targets, and staff KPIs — improving inventory accuracy by ~20%.
- Introduced standardized data entry templates and reporting formats, reducing reporting errors by ~35%.
- Supervised daily operations for a high-traffic location (100+ daily customers); consistently met monthly sales targets.
- Applied analytics concepts from PG coursework to live business problems, leading to formal promotion into the data-focused role.

PROJECTS

Medical RAG Chatbot | Personal Project

Live Demo: medical-chatbot-2szt83tc7hmjnnihya9nyk.streamlit.app | **GitHub:** github.com/Levi3061/medical-chatbot

- Built an end-to-end RAG pipeline that answers medical queries grounded in the GALE Encyclopedia of Medicine (759 pages) — reducing manual lookup time from minutes to under 10 seconds.
- Implemented semantic search using HuggingFace sentence-transformers and FAISS vector store with RecursiveCharacterTextSplitter for optimal chunking.
- Deployed full-stack app with Streamlit UI using LangChain, LangGraph, and Groq LLaMA 3.1 — live on Streamlit Cloud.
- Tech: Python · LangChain · FAISS · HuggingFace · Groq API · Streamlit · ChromaDB

Data Science Challenge Library | Georgian College

- Co-built a web platform for interactive data science challenges with ML-based automated answer evaluation and real-time feedback.
- Created Power BI dashboards for user engagement and performance tracking.
- Tech: Python · Scikit-learn · Power BI

IBM Web Traffic — Bot Detection Analysis | Georgian College

- Led team analysis of IBM's web traffic to classify bot vs. legitimate activity using statistical methods and pattern recognition.
- Built automated Power BI dashboards for bot detection trends.
- Tech: Python · Pandas · Power BI

EDUCATION

Postgraduate Degree — Artificial Intelligence | Georgian College, Barrie, Canada | Sep 2023 – Apr 2024

- Machine Learning, Deep Learning (CNN, RNN), NLP, Computer Vision, Model Deployment, Python for AI

Postgraduate Degree — Big Data Analytics | Georgian College, Barrie, Canada | Sep 2022 – Apr 2023

- SQL, Data Visualization, Statistical Analysis, ETL, Data Warehousing, Power BI, Python for Data Analysis

Bachelor of Computer Applications (BCA) — Computer Science | St. Xavier's College, Ahmedabad, India | 2018 – 2021

- Data Structures, SDLC, Database Management, Programming Fundamentals, Networking

CERTIFICATIONS

- Machine Learning Foundations – Amazon Web Services (AWS), Apr 2024
- AWS Academy Cloud Foundations – Amazon Web Services (AWS), Apr 2024
- Python for Everyone – Esri, Mar 2026
- Power BI Essential Training – LinkedIn Learning, May 2022
- Learning Data Analytics: 1 Foundations – LinkedIn Learning, Apr 2022

VOLUNTEERING

Volunteer | Catch Foundation (Environmental NGO), India | Nov 2019 – Sep 2022

- Field data collection and documentation for tree plantation and land restoration projects across multiple sites over ~3 years.
